

MEDICINALPLANTBIOTECHNOLOGY (MPG201T)

SCOPE

To explore the knowledge of Biotechnology and its application in the improvement of quality of medicinal plants

OBJECTIVES

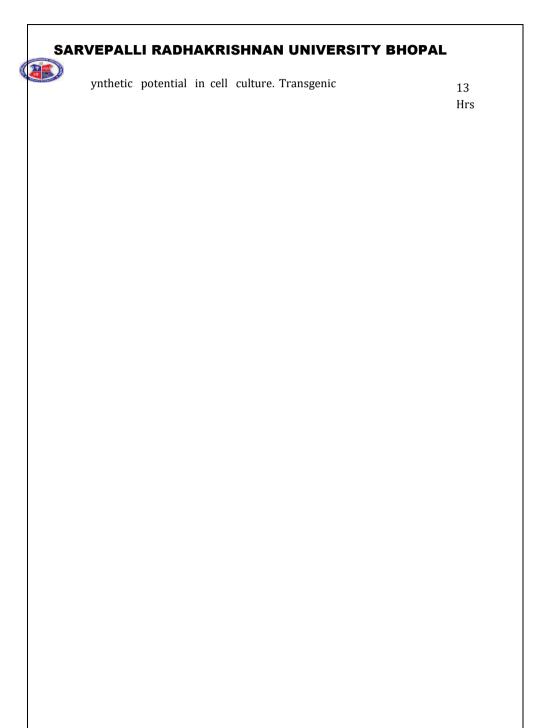

Upon completion of the course, the student shall be able to,

- Use the biotechnological techniques for obtaining and improving the quality of natural products/medicinal plants

THEORY 60Hrs

- Introduction to Plant biotechnology. Historical perspectives, prospects for development of plant biotechnology as a source of medicinal agents. Applications in pharmacy and allied fields. Genetic and molecular biology as applied to pharmacognosy, study of DNA, RNA and protein replication, genetic code, regulation of gene expression, structure and complicity of genome, cell signaling, DNA recombinant technology.
- 2 Different tissue culture techniques: Organogenesis and embryogenesis, 15 synthetic seed and monoclonal variation, Protoplast fusion, Hairy root multiple shoot cultures and their applications. Micro propagation of medicinal and aromatic plants. Sterilization methods involved in tissue culture, gene transfer in plants and their applications.
- 3 Immobilisation techniques & Secondary Metabolite Production: 15
 Immobilization techniques of plant cell and its application on Hrs
 secondary metabolite Production. Cloning of plant cell: Different
 methods of cloning and its applications. Advantages and
 disadvantages of plant cell cloning. Secondary metabolism in tissue
 cultures with emphasis on production of medicinal agents.
 Precursors and elicitors on production of secondary metabolites.
- 4 Biotransformation and Transgenesis: Biotransformation, bioreactors for pilot and large scale cultures of plant cells and retention of

bi o

- plants, methods used in gene identification, localization and sequencing of genes. Application of PCR in plant genome analysis.
- 5 Fermentation technology. Application of Fermentation 05 technology, Production of ergot alkaloids, single cell proteins, Hrs enzymes of pharmaceutical interest.

ADVANCED PHARMACOGNOSY- II (MPG 202T)

SCOPE

To know and understand the Adulteration and Deterioration that occurs in herbal/natural drugs and methods of detection of the same. Study of herbal remedies and their validations, including methods of screening

OBIECTIVES

Upon completion of the course, the student shall be able to know the,

- validation of herbal remedies
- methods of detection of adulteration and evaluation techniques for the herbal drugs
- methods of screening of herbals for various biological properties

THEORY 60Hrs

- Herbal remedies Toxicity and Regulations: Herbals vs Conventional 12 drugs, Efficacy of Herbal medicine products, Validation of herbal Hrs therapies, Pharmacodynamic and Pharmacokinetic issues.
- 2 Adulteration 12 and Deterioration: Introduction. Types οf Adulteration/ Substitution of Herbal drugs, Causes and Measures of Hrs Adulteration, Sampling Procedures, Determination of Foreign Matter, DNA Finger printing techniques in identification of drugs of natural origin, detection of heavy metals, pesticide residues, phytotoxin, microbial contamination herbs and in formulations.
- 3 Ethnobotany and Ethnopharmacology. Ethnobotany in herbal drug 12 evaluation, Impact of Ethnobotany in traditional medicine, New Hrs development in herbals, Bio-prospecting tools for drug discovery, Role of Ethnopharmacology in drug evaluation, Reverse Pharmacology.
- 4 Analytical Profiles of herbal drugs: Andrographis paniculata, Boswellia 12 serata, Coleus forskholii, Curcuma longa, Embelica officinalis, Hrs Psoralea corylifolia.
- 5 Biologicalscreeningofherbaldrugs:Introduction and Need for Phyto-Pharmacological Screening, New Strategies for evaluating Hrs

Natural Products, In vitro evaluation techniques for Antioxidants, Antimicrobial and Anticancer drugs. In vivo evaluation techniques for Anti-inflammatory, Antiulcer, Anticancer, Wound healing, Antidiabetic, Hepatoprotective, Cardio protective, Diuretics and Antifertility, Toxicity studies as per OECD guidelines.

|ND|ANSYSTEMSOFMED|C|NE | (MPG203T)

SCOPE

To make the students understand thoroughly the principles, preparations of medicines of various Indian systems of medicine like Ayurveda, Siddha, Homeopathy and Unani. Also focusing on clinical research of traditional medicines, quality assurance and challenges in monitoring the safety of herbal medicines.

OBJECTIVES

After completion of the course, student is able to

- To understand the basic principles of various Indian systems of medicine
- To know the clinical research of traditional medicines, Current Good Manufacturing Practice of Indian systems of medicine and their formulations.

THEORY 60Hrs

Fundamental concepts of Ayurveda, Siddha, Unani and Homoeopathy systems of medicine Hrs Different dosage forms of the ISM.

Ayurveda: Ayurvedic Pharmacopoeia, Analysis of formulations and bio crude drugs with references to: Identity, purity and quality. Siddha: Gunapadam (Siddha Pharmacology), raw drugs/Dhatu/Jeevam in Siddha system of medicine, Purification process (Suddhi).

 ${\bf 2} \qquad {\bf Naturopathy, Yogaand Arom ather apypractices}$

12

a) Naturopathy - Introduction, basic principles and treatment modalities.

Hrs

- b) Yoga Introduction and Streams of Yoga. Asanas, Pranayama, Meditations and Relaxation techniques.
- c) Aromatherapy Introduction, aroma oils for common problems, carrier oils.
- Formulationdevelopmentofvarious systems of medicine Salient features of the techniques of preparation of some of the important class of Hrs Formulations as per Ayurveda, Siddha, Homeopathy and Unani Pharmacopoeia and texts.

 Standardization,
 Shelf life and Stability studies of ISM formulations.

4 Schedule T – Good Manufacturing Practice of Indian systems of medicine

12 Hrs

Components of GMP (Schedule – T) and its objectives, Infrastructural requirements, working space, storage area, machinery and equipments, standard operating procedures, health and hygiene, documentation and records.

Quality assurance in ISM formulation industry - GAP, GMP and GLP. Preparation of documents for new drug application and export registration.

Challenges in monitoring the safety of herbal medicines: Regulation, quality assurance and control, National/Regional Pharmacopoeias.

5 TKDL, Geographical indication Bill, Government bills in AYUSH, ISM, CCRAS, CCRS, CCRH, CCRU

HERBALCOSMETICS (MPG204T)

SCOPE

This subject deals with the study of preparation and standardization of herbal/natural cosmetics. This subject gives emphasis to various national and international standards prescribed regarding herbal cosmeceuticals.

OBJECTIVES

After completion of the course, student shall be able to,

- understand the basic principles of various herbal/natural cosmetic preparations
- □ current Good Manufacturing Practices of herbal/natural cosmetics as per the regulatory authorities

THEORY 60Hrs

- Introduction: Herbal/natural cosmetics, Classification & 12
 Economic aspects. Hrs
 Regulatory Provisions relation to manufacture of cosmetics: License, GMP, offences & Penalties, Import & Export of
 Herbal/natural cosmetics, Industries involved in the production of
 Herbal/natural cosmetics.
- 2 Commonly used herbal cosmetics, raw materials, preservatives, 12 surfactants, humectants, oils, colors, and some functional herbs, Hrs preformulation studies, compatibility studies, possible interactions between chemicals and herbs, design of herbal cosmetic formulation.
- 3 Herbal Cosmetics : Physiology and chemistry of skin and 12 pigmentation, hairs, scalp, lips and nail, Cleansing cream, Lotions, Hrs Lipsticks, Bath products, soaps powders. Face packs. and baby product. Preparation and standardisation of the following: Tonic, Bleaches, Dentifrices and Mouth washes & Tooth Pastes. Cosmetics for Nails.
- 4 Cosmeceuticals of herbal and natural origin: Hair growth formulations, 12 Shampoos, Conditioners, Colorants & hair oils, Fairness Hrs formulations, vanishing & foundation creams, anti-sun burn preparations, moisturizing creams, deodorants.

5 Analysis of Cosmetics, Toxicity screening and test methods: Quality 12 control and toxicity studies as per Drug and Cosmetics Act. Hrs

HERBALCOSMETICSPRACTICALS (MPG205P)

- 1. Isolation of nucleic acid from cauliflower heads
- 2. Isolation of RNA from yeast
- 3. Quantitative estimation of DNA
- 4. Immobilization technique
- 5. Establishment of callus culture
- 6. Establishment of suspension culture
- 7. Estimation of aldehyde contents of volatile oils
- 8. Estimation of total phenolic content in herbal raw materials
- 9. Estimation of total alkaloid content in herbal raw materials
- 10. Estimation of total flavonoid content in herbal raw materials
- 11. Preparation and standardization of various simple dosage forms from Ayurvedic, Siddha, Homoeopathy and Unani formulary
- 12. Preparation of certain Aromatherapy formulations
- 13. Preparation of herbal cosmetic formulation such as lip balm, lipstick, facial cream, herbal hair and nail care products
- 14. Evaluation of herbal tablets and capsules
- 15. Preparation of sunscreen, UV protection cream, skin care formulations.
- 16. Formulation & standardization of herbal cough syrup.
